Specification

Embodiments of the subject matter of the Invention will be described in greater detail below based on the drawing. [Shown on:]

Claims

10. A [Modular] modular multiple connection strap for cable connections, comprising a one-piece plastic housing (1) [made of plastic with] having a longitudinal side, a plurality of modular spaced and open chambers (2) on the longitudinal side for inserting respectively, one contact assembly (3), characterized in that connection strap is a through strap, or a separating strap or a switching strap, in that the contact assemblies (3) are through contacts that can be converted to switching contacts by separating a web (6) that connects the inside ends of [the] tongues (4) of a contact assembly (3) into separating contacts, or by inserting an insulating separator or through deformation.

11. The modular [Modular] multiple connection strap according to claim 10, characterized in that the chambers (2) in [the] an area of a web (6) that connects the tongues (4) of a contact assembly (3) on the inside end are provided with an opening for temporarily accommodating a separating tool [insulation-piercing connecting device].
